# Keox RLH

Keox RLH can be installed almost every chassis and it is very customizable. Unit can be splitted for example four different compartments, glass, paper, metal and bio. Keox RHL equipemented with four different compartments is highly cost efficient. Sideways moving elevator can spread or sepearate wastes in their own compartments.

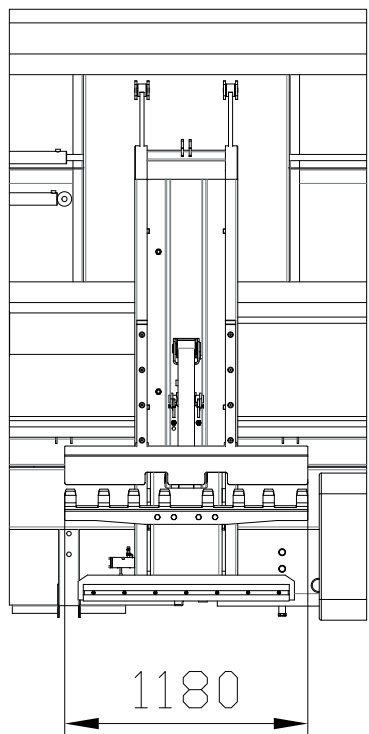

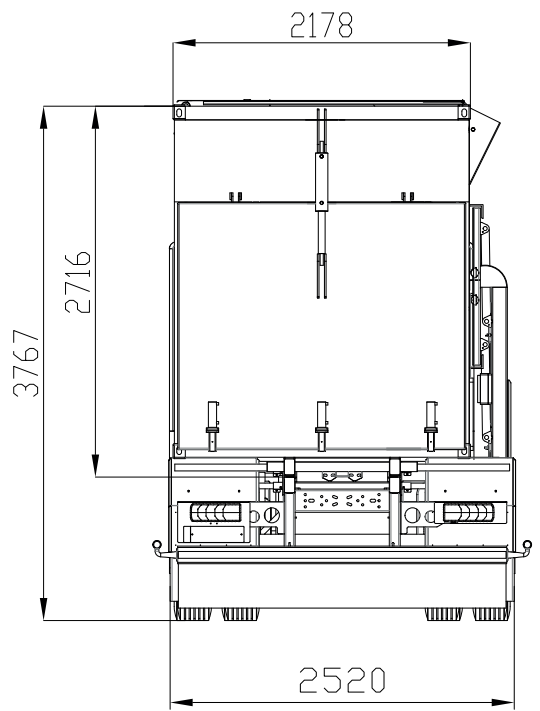

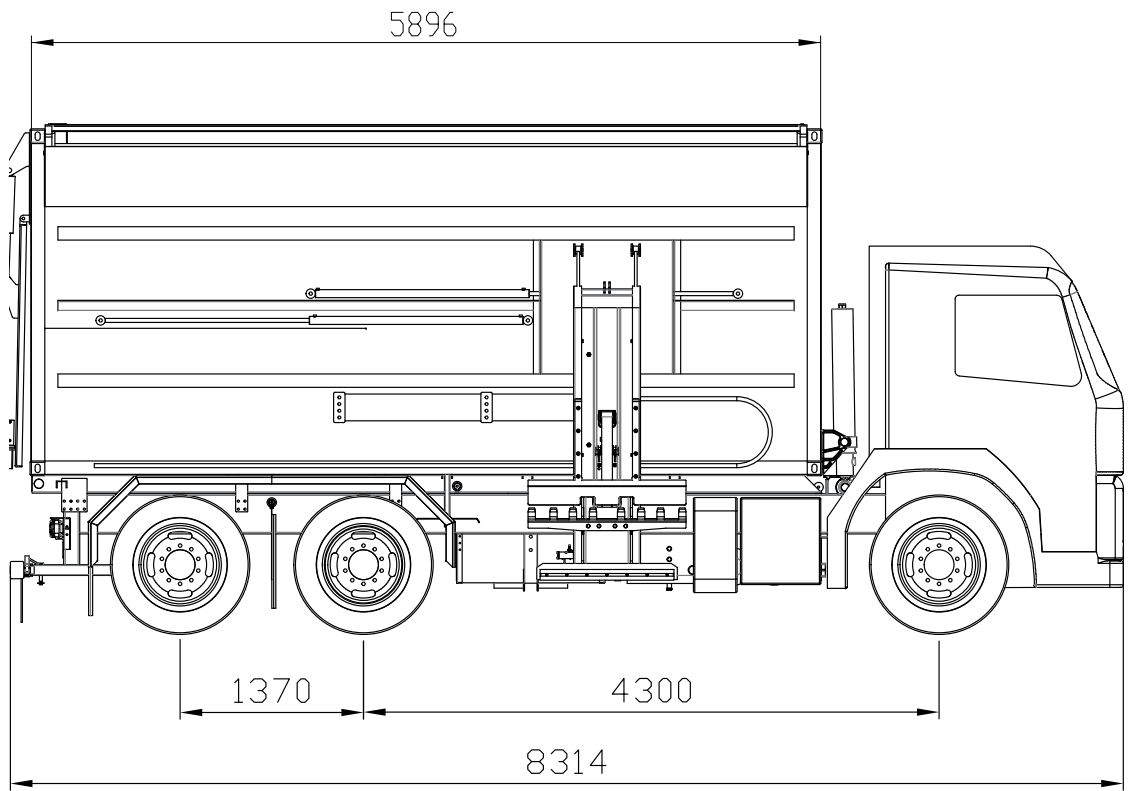

- Can be installed to Euro 6 gas-operated trucks without modifications
- Side loader is quick to use and easy to control
- A reliable sideways moving elevator
- For paper, glass, metal and bio waste
- Unit emptying from rear with dumper
- Can bus PLC control with cabin display
- A weighting unit can be fitted
- Not depented on carrier model
- Bin counter
- Fe or RST struckedure

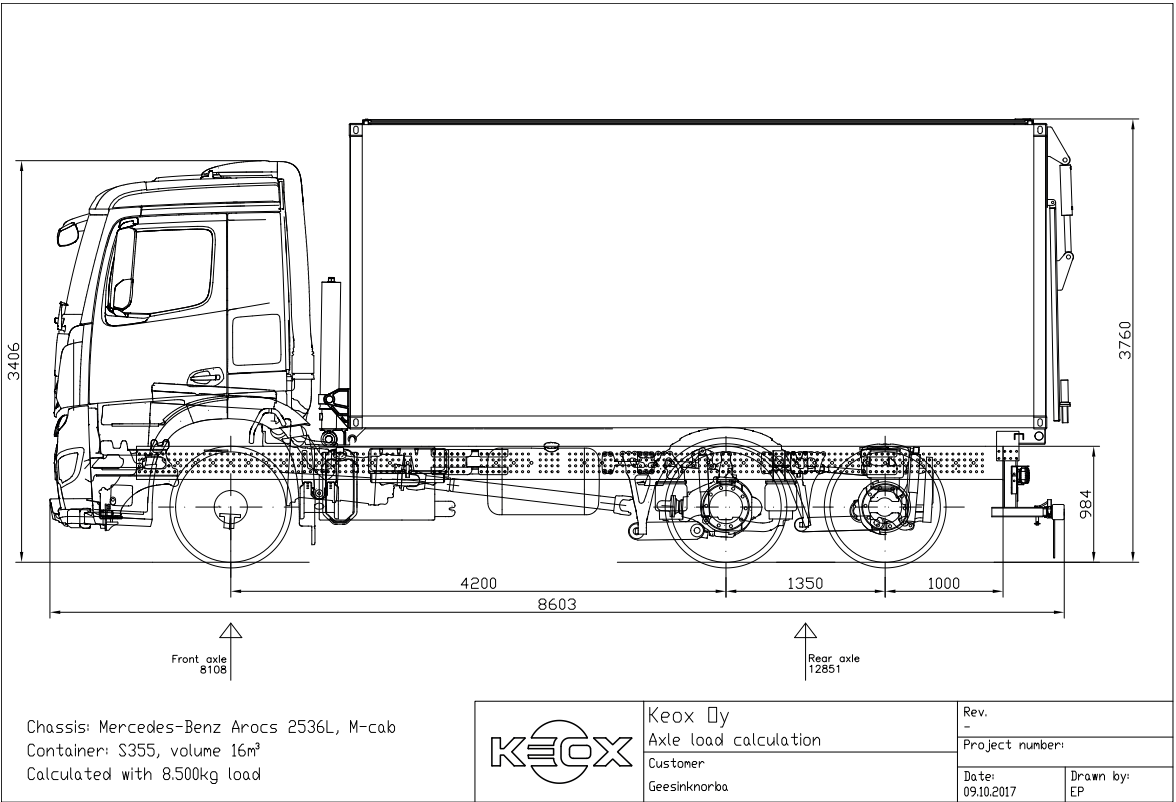

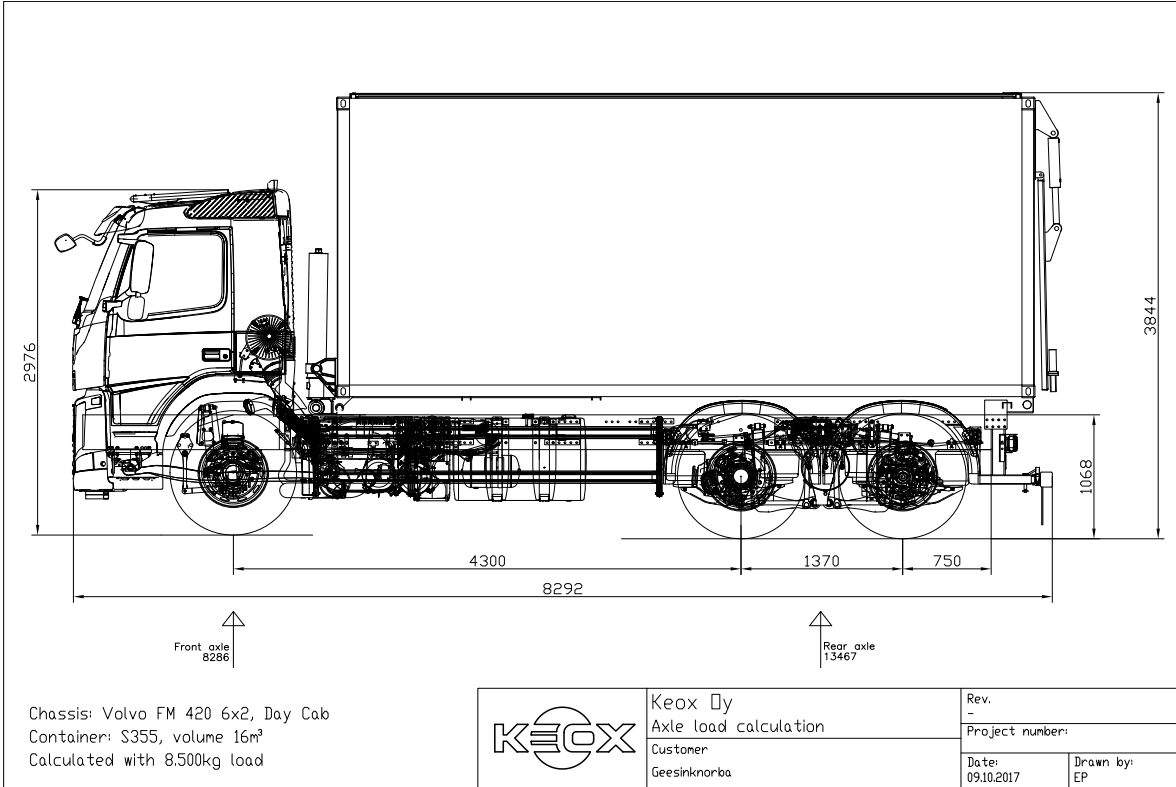

# TECHNICAL DEFINITIONS

TOTAL WEIGHT	3000kg.
TOTAL LENGTH OF THE FINAL UNIT	Around 6,5 meters
HEIGHT OF THE UNIT	Around 3,5 meters
TYPE OF PTO	ENGINE
BODY VOLUME	Around 15m3
INTERNAL DIMENSIONS	Around 3200x2200X1800mm
MATERIAL OF THE BODY	Type Hardox 450HB mini
THICKNESS	4mm in one piece folded over height
FLOOR	One piece recessed with 4mm thickness
SOUNDPROOFING	All the body (floor, front, sides)
EMPTYING	By a hydraulic cylinder double effect and compass
GENERAL SPECIFICATIONS	Red light on the dashboard to indicate if the lifter position is upper than 400mm in relation to the ground Predisposition of the comb for bins identification Balancing valve between the 2 cylinder chambers Emergency button on each side of the unit to stop equipment Roof on the top of the unit on the front side Roof hatch with mechanical opening linked to the tilting of the tanks Remote control for emptying in cabin Rear hydraulic door with automatic locking/delocking Sides of the body smooth Tool chest locking with key Broom and shovel support at the front right of the body 2 layers of primer and 3 of polyurethane paint
SECURITY ASPECTS	CE conformity certificate Sound signal indicating the door is opening / open / closing System opening the door without switching the body Camera 2 footboards Speed limitation 30km/h and backward impossible Penalty of 300 seconds 2 flash led lights at the back of the unit 2 orange led lights on the right side to illuminate work zone UTAC specifications (can be in France if you want)
REGULATIONS	Goes under BK1 and BK2 regulations
LIFTER	Manual manipulation 120 to 770 liters bins capacity Removable device for collecting bulk waste System to tidy the removable device in the wheelbase System of damping the bins at the emptying Handbars for workers with heating system
